

Official Press Release

The International Society for Photogrammetry and Remote Sensing (ISPRS) proudly announces the highly anticipated ISPRS 2026 Congress, set to take place in the vibrant city of Toronto. Scheduled for 4-11 July, 2026, the Congress promises to be a landmark event, bringing together leading experts, researchers, practitioners, and industry professionals from around the world to explore the latest advancements and innovations in photogrammetry, remote sensing, and spatial information sciences.

With a rich history of fostering collaboration, innovation, and knowledge exchange, the ISPRS Congress has established itself as a premier platform for showcasing cutting-edge research, sharing best practices, and addressing the most pressing challenges facing our discipline. The 2026 Congress in Toronto will build upon this legacy, offering a dynamic program of keynote speakers, technical sessions, workshops, and networking opportunities designed to inspire, educate, and connect participants from diverse backgrounds and fields of expertise.

This significant gathering marks a pivotal moment in the history of ISPRS. The last Congress hosted in Canada was held in Ottawa in 1972, making the forthcoming event in Toronto a truly historic occasion for the society and its members worldwide.
